

PAPRIUM™

PRESS RELEASE

With PAPRIUM, WaterMelon Games strikes harder and beats stronger!

Seven years after the release of Pier Solar on the SEGA Mega Drive / Genesis - hailed by the fans as "... *perhaps the most successful homebrew of its type, ever*" - WM brings it to the next level!

March 28, 00:00 GMT - Fellow Citizens, you have been waiting but the wait is almost over. Get ready! Big things are about to happen! After more than 4 epic years of development, WaterMelon Games is proud to present its new 16-Bit game: PAPRIUM (code-name: "ProjectY"), a postapocalyptic, outrageous, street brawler. PAPRIUM has been crafted at WM's Magical Game Factory using Investor's votes and suggestions. This game is as much yours as it is ours. PAPRIUM has been developed by a team driven by true passion and 16-Bit excellence.

Year 8A2, somewhere at equidistant point between Shanghai, Tokyo and Pyongyang, a Megapolis rose from ashes of the shortest but most devastating nuclear war in history, its name is PAPRIUM. BRUTAL, MASSIVE. You will fight your way through the city with Tug, Alex and Dice. Redefine the word justice, deal with the BLU drug temptation, and more importantly: stay alive!

Soon available for sale at WM's Magical Game Factory, PAPRIUM is the biggest Mega Drive / SEGA Genesis game ever made. As if it wasn't enough, PAPRIUM's 80MEG cartridge embeds the DT128M16VA1LT - aka "Datenmeister" - chipset for the ultimate 16-Bit experience. Never has a 16-Bit game been so big, so rich, so crisp. Never has the MEG power been so intimidating! Check out the full specs and get ready to cry!

PAPRIUM boasts 24 Levels and up to 5 Selectable Characters! You can play in co-op with one or two simultaneous players and choose from the multiple game modes such as the "Arcade mode" - which will let you play a predefined section of PAPRIUM's megapolis for a brainless street brawler experience - or the "Original mode" - which will let you save your progression, pick multiple paths and shape the city for a better or worse ending.

- 1 or 2 simultaneous players. • 80MEG. • AAA Beat Them All gameplay (@ uncompromized 60fps). • Embeded DT128M16VA1LT chipset.
- Compatible with GRAND STICK III.

PAPRIUM is available in three different editions:

- INVESTOR's edition, exclusive to WM's Magical Game Factory investors.
- LIMITED edition, available in three regions (Japanese, Usa, Europe).
- CLASSIC edition, black clamshell box with black grid design.

GRAND STICK III

Expanding the experience, to be released with the game: The GRANDSTICK III, the ultimate arcade stick to be available in a limited edition, optimized for PAPRIUM. Professional grade arcade stick with high quality SANWA® and WM customized switches.

- High-quality switches (SANWA + WM). • Four-direction joystick and eight buttons. • Dual connectivity with Mega Drive / SEGA Genesis and USB. • State-of-art casing and finish (Aluminium, Stainless-Steel and Acrylic).

PAPRIUM and GRANDSTICK III targeted release date:

September 16, 2017.
